

NEW!

Dimax Int. GmbH (Germany) presents an updated version of the KS 4000iE S inverter generator **with an ATS connection possibility.**

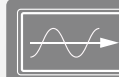

The updated KS 4000iE S inverter generator from Könnér & Söhnen® features a possibility of connection for an external ATS unit (Automatic Transfer Switch). The generator control panel has an 8-pin ATS input that is compatible with the KS ATS 4/25 Gasoline ATS unit. The ATS unit automatically starts the generator and switches the load to it when the main power source is turned off.

This user-friendly, compact device in soundproof housing has already proven to be a reliable, low-noise device that is ideally suited for supplying sophisticated, sensitive equipment thanks to the integrated microprocessor unit.

KS 4000iE S

Max power/Nominal power, kW	4.0/3.5
Current (max), A	17.4
Outlets	2 x Schuko 230 V
Engine start	Manual/electric
Fuel tank volume, l	12
Possibility of parallel connection	+
Input for ATS	+
Net dimensions (LxWxH), mm	620 x 440 x 510
Net weight, kg	40
